Erasmus+

Enriching lives, opening minds.

ERASMUS POLICY STATEMENT

Learn Key Institute (LKI) Malta

ECHE 2021-2027

Learnkey Malta plans to actively participate in the Erasmus+ Programme by engaging in the following key activities:

Key Action 1 (KA1)

–

Learning Mobility of Individuals:

We aim to facilitate student mobility for studies and traineeships to enhance learning outcomes and employability. We will also support staff mobility for teaching and training to foster professional development and the exchange of innovative teaching practices. Additionally, we plan to organize Blended Intensive Programmes to integrate virtual learning opportunities with physical mobility, promoting digital transformation.

Key Action 2 (KA2) – Cooperation Among Organisations and Institutions:

We will pursue Partnerships for Cooperation to develop joint projects that foster innovation and knowledge exchange with other European institutions. We also plan to explore Alliances for Innovation to strengthen links between education, research, and business, focusing on addressing skills gaps in emerging industries.

Key Action 3 (KA3) – Support for Policy Development and Cooperation:

Learnkey Malta aims to participate in policy dialogue and cooperation activities that contribute to European education objectives. We also aspire to engage with Jean Monnet Actions to promote excellence in teaching and research on European integration.

These activities will be implemented through clear internal policies, transparent communication, and collaboration with national and international partners. We will ensure rigorous support structures for participants, including pre-departure training, mentorship, and follow-up activities to maximize impact.

By participating in the Erasmus+ Programme, Learnkey Malta aims to achieve the following objectives:

1. Enhance the Quality of Education and Training:

Participation will provide access to new teaching methods, digital tools, and resources, improving the quality and relevance of our educational offerings.

2. Foster Internationalization:

By creating a vibrant network of international partnerships, we aim to increase the mobility of students and staff, enriching their academic and cultural experiences and preparing them for a globalized world.

3. Promote Inclusion and Accessibility:

Learnkey Malta is committed to providing opportunities for individuals from diverse backgrounds, including those with fewer opportunities, ensuring equitable access to Erasmus+ activities.

4. Support Innovation and Digital Transformation:

Through cooperation projects, we aim to integrate innovative practices and digital tools into our institution, contributing to the modernization of higher education.

5. Contribute to the European Education Area:

Our participation aligns with the goal of building a European Education Area by fostering collaboration, enhancing recognition of qualifications, and promoting sustainable practices.

Impact on the Institution:

Erasmus+ participation will make Learnkey Malta more modern, international, and competitive. It will enhance the skills and employability of students, improve staff expertise, and strengthen the institution's ability to respond to emerging educational and societal challenges.

Our Erasmus+ strategy outlines key targets and objectives to enhance mobility, improve quality, foster cooperation, and ensure sustainability with long-term impact. To increase mobility, we aim to boost student mobility by 20% within three years and achieve at least 15 staff mobilities annually for teaching and training. Regarding quality of implementation, we seek to attain 90% positive feedback from participants about their Erasmus+ experience and develop robust support mechanisms, including pre-departure orientations and reintegration workshops. In terms of cooperation projects, we aim to establish partnerships with at least five new European institutions within the next two years and initiate at least two innovative cooperation projects focused on digital skills and sustainability by 2026. To promote sustainability and long-term impact, we plan to incorporate at least two sustainable practices, such as virtual mobility and green travel policies, into Erasmus+ activities, while increasing institutional engagement with European policies through regular participation in KA3 activities. These indicators will be reviewed and updated periodically, with progress reports shared transparently on our website and with the Erasmus+ National Agency.
